PROFESSIONAL SUMMARY

Detail-oriented and passionate **QA Engineer** with hands-on experience in manual and automation testing of web applications. Skilled in creating and executing test cases, identifying defects, and improving product quality using tools like **Selenium WebDriver, PyTest, Jira, and Git**. Seeking an opportunity to apply my testing expertise and contribute to delivering high-quality, user-centric software products in an Agile environment.

EDUCATION

Acharya Nagarjuna University — Guntur, India
Master of Computer Application (MCA) | GPA: 7.5 — **October 2023 - July 2025**
SDE Andhra University — Eluru, India
Bachelor of Arts | GPA: 6.0 — **October 2018 - January 2022**

WORK EXPERIENCE

QA Analyst Intern – Kloc Technologies | February 2026 – Present | Hybrid

- Participating in **daily stand-up meetings** with QA and development teams to discuss testing progress, defects, and sprint updates in an Agile environment.
- Performing **exploratory and manual testing** on e-commerce websites to identify UI, functionality, and usability issues.
- Identifying and reporting **UI/UX defects** such as layout misalignment, overlapping elements, broken links, and responsiveness issues across different web pages.
- Creating **bug reports and documentation**, clearly explaining issues to developers to support faster debugging and resolution.
- Collaborating with developers to **retest fixes and verify defect resolution,** ensuring application stability and quality.

QA Intern – Wyreflow Technologies | September 2025 – October 2025 | Remote

- Performed **manual and UI testing** across multiple web application modules to identify functionality, layout, and responsiveness defects.
- Logged, tracked, and retested defects using **Jira**, ensuring effective communication between QA and development teams.
- Designed and executed **test cases**, conducted **regression testing**, and validated bug fixes to ensure timely defect resolution within sprint cycles.
- Performed cross-browser and responsive testing to verify consistent functionality and visual design across different browsers, devices, and screen resolutions**.**

PROJECTS

Web Application Testing – Shield Healthcare
Tech Stack: Manual Testing, Chrome DevTools

- Performed end-to-end functional and UI testing across multiple modules of the healthcare web platform.
- Validated navigation flow, page redirections, and content rendering for consistency and accuracy.
- Identified and reported UI alignment issues, broken links (404 errors), and usability defects.
- Executed regression testing to verify bug fixes and ensure no impact on existing functionality.

E-Commerce Website Testing – Kerala Pothys
Tech Stack: Manual Testing, Cross-Browser Testing

- Tested product listing, filtering, and sorting functionalities on collection pages.
- Validated end-to-end user journey including PDP, cart, and checkout workflow.
- Verified price display, discounts, and product variant selection (size/color) for accuracy.
- Identified UI inconsistencies and workflow issues affecting user experience.

Logistics Website Testing – Globe Moving
Tech Stack: Manual Testing, UI Testing

- Performed functional testing on service pages and quote request forms to ensure proper workflow execution.
- Validated form inputs, error handling, and submission behavior under different test scenarios.
- Verified navigation links, service information, and contact workflows for accuracy and consistency.
- Identified usability issues and UI defects, and suggested improvements to enhance user experience.

TECHNICAL SKILLS

Testing Skills: Manual Testing, Automation Testing, Functional Testing, Regression Testing, Smoke & Sanity Testing, UI/UX Testing

Automation Tools: Selenium WebDriver, PyTest, POM Framework, Jenkins (Basic)

Bug Tracking Tools: Jira

Programming Languages: Python

Web Technologies: HTML, CSS

Database: SQL (Basic Queries, Data Validation)

Other Tools: Git, Postman (API Testing), Excel (Test Data Management)

Methodologies: Agile (Scrum), STLC, SDLC, Defect Life Cycle
